○ Summary

I specialize in building high-quality native iOS and Android applications (Swift | Kotlin), as well as cross-platform solutions using React Native, Flutter, and other popular frameworks. My expertise extends to all aspects of mobile app development, including UI/UX design, API integration, performance optimization, testing, and deployment. My top priority is to deliver high quality work that meets my clients' specific needs and requirements. Whether you need a brand new app built from scratch or an existing app revamped and updated, I can provide the expertise and skills needed to get the job done on time and within budget.

○ Some of the services I offer include:

- > Native iOS and Android app development
(Swift - 8 years, Kotlin - 8 years, Java - 8 years)
- > Cross-platform app development with React Native, Flutter, etc.
(Flutter - 4+ years)
- > Custom UI/UX design and development
- > Integration of third-party APIs and services
- > Performance optimization and app scaling
- > Testing and debugging
- > Deployment to app stores and ongoing maintenance and support.
- User Interface on multiple resolution Devices
- Networking with Any kind of servers
(GraphQL, Amazon server, Rest-Post Api)
- Social Media login integration
- Handle notification consider the os versions with OneSignal, FCM
- Native Java, Kotlin, flutter, Swift, SwiftUI,
- Background services and broadcast receiver
- Third party library and module integration
- Design and developing with flutter
- Payment Gateways, Location/GPS tracking,
- E commerce, Chatting, audio, video, Live streaming
- Sketch, InVision, Figma, zeplin
- Version Control : Bitbucket, Gitlab, Github
- Firebase Auth, Cloud function, Crashlytics, Fabric
- Realm, Sqlite, Preference, Firestore, MySQL, Core Data
- Machine Learning TensorFlow, face recognition
- in-app-Billing, subscription, Debugging, Testing.
- Google Map Api, Translate Api, youtube api
- Facebook ads, google Ad-mob ads

- Hybrid Flutter App Development
- Native Android App Development
- Native iOS App Development
- Dart, Kotlin, Java, Swift, SwiftUI Development
- RESTful API Development and Integration
- 3rd Party SDK Integration, Android Studio, Xocde
- Deploy Apps on Appstore and Playstore

James Golden

Senior Mobile App Developer (Android/iOS, Swift, Kotlin, Java, React-Native, Flutter)

○ AVANAN New York, US

Mobile Application Developer Feb 2015 – Feb 2018

- Showcased expertise in Swift and Kotlin, crafting native apps that prioritize performance, security, and user engagement.
- Collaborated closely with backend developers to integrate APIs and ensure smooth data flows between the app and server.
- Leveraged agile development methodologies to deliver features and updates in a fast-paced and iterative environment.

○ Linte Sao Paulo, Brazil

React Native/Android Developer May 2013 – Feb 2018

- I provided application development services to US and international companies, with a focus on early-stage startups.
- I primarily specialized in React Native apps, and also leveraged my experience with web frameworks (Angular and React) and backend development to build high-quality web apps.
